Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meincer in view of Lawson. The patent to Meincer teaches structure substantially as claimed including a base (10), support structure comprising a flexible film wrapped around one of the multiple layers around a first and a second axis, the first and second axis being perpendicular to each, the axis in the same plane, in as much as the instant invention's, the only difference being that the base is not adhered to the film. However, the patent to Lawson teaches the use of base members (60) adhesively attached to a package system to provide a unitary structure. It would have been obvious and well within the level of one having ordinary skill in the art to modify the structure of Meincer to include an adhesively mounted base structure, as taught by Lawson since such

structure is used in the same intended purpose of providing a unitary package structure, thereby providing structure as claimed. The use of particular materials, such as plastics, foam etc are conventional materials used in the formation of pallets. To use such materials would have been obvious and well within the level of ordinary skill in the art. The percentage of coverage is a matter of desirability and would have been obvious and well within the level of ordinary skill in the art. The method of producing the pallet would have been obvious in view of the structures. It is noted that the base is disposable/recyclable as claimed.

Response to Arguments

Applicant's arguments filed 10-11-02 have been fully considered but they are not persuasive. The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. In the instant case, the patent to Meincer teaches the structure as claimed including base and supporting structure, the difference being that the base is not adhesively adhered to the support structure, which includes the wrap. However, the patent to Lawson teaches a base structure that includes adhesive to provide a unitary structure between a base and a support structure. One of ordinary skill in the art with respect to the patent to Meincer would have looked to the teachings of Lawson to include a means (adhesion) to provide a

unitary structure to aid in movement of a loaded unit. It is noted that any structure is disposable and wood, paper, plastics are materials that are readily recyclable.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

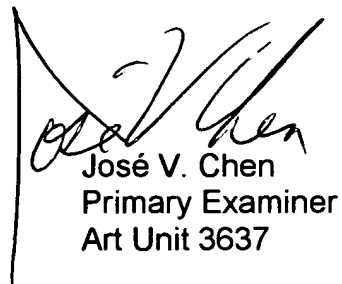

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
